Description

This 2016 Nissan Micra n-tec is a practical hatchback powered by a 1.2 litre petrol engine that meets Euro 6 emission standards. With only 36,919 miles on the clock, this vehicle has covered a low mileage for its age and has been maintained by just two owners from new. The n-tec trim level offers a range of features designed to make daily driving more convenient, including climate control to maintain a comfortable cabin temperature and automatic headlights with a dusk sensor that activate when needed. Parking is made simpler with the inclusion of rear parking sensors, while the NissanConnect system provides Bluetooth telephone integration for staying connected on the move. These combined features, alongside the vehicle's low insurance group rating, make this a sensible and well-equipped choice for those seeking a reliable and cost-effective car.
